PROFILE

Currently I am pursuing B.tech in Electrical and Electronics from Birla Institute of Technology, Mesra . I am tech enthusiast who loves all aspects of programming like Competitive programming, Web development, Machine Learning and hardware programming.

SKILLS

- C++
- DSA
- Python
- HTML
- CSS
- Basic Machine Learning
- Numpy
- Pandas
- Arduino

PROJECTS

PORTFOLIO PROJECT

HTML CSS JAVASCRIPT

- Basic web development project which describes my profile.
- Built using basic tools like HTML, CSS and little bit of Javascript.
- Learning advanced technologies like React JS to improve the project also making it responsive using media query.

HATE SPEECH DETECTION

PYTHON MACHINE LEARNING

- Machine learning project built for Tech-a-Thon(a hackathon conducted in our college).
- Built using python libraries like numpy, pandas, tensorflow and based on LSTM model.
- Trying to make it more efficient.

STOCK PRICE PREDICTOR

Python Machine Learning

- Using machine learning to predict stock price of a particular company.
- Built using numpy, pandas , tensorflow and based on LSTM model.
- Trying to improve overfitting and improve its accuracy for real time use and profits.

EDUCATION

D.A.V PUBLIC SCHOOL,RANCHI

2017-2019

**BIRLA INSTITUTE OF
TECHNOLOGY,MESRA**

Btech in Electrical and
Electronics engineering,
3rd year
